IN THE CLAIMS

Please cancel Claims 2-68 without prejudice or
disclaimer of the subject matter recited therein.

Please amend Claim 1 as follows:

1. (Amended) An information signal processing
apparatus connected to a communication control network,
[characterized by] comprising:

reset reception means for, upon issuing an update
request when a network configuration must be updated in a
remote network other than the communication control network
connected to the information signal processing apparatus,
receiving network specifying information for the issued
update request, and a network update notification.

Please add Claims 69-115, as follows:

--69. The apparatus according to claim 1, wherein
said reset reception means uses a predetermined address as a
